PROFILE SUMMARY

Lead Java Engineer with more than 10 years of experience in developing and managing different enterprise software applications. Worked on multiple projects, better at multi-tasking and quick to learn new technologies to enhance team's productivity. Always proactive to add value to overall project which benefits the end client.

With addition to great work experience in educational, financial institutes, E-Commerce startups and government agencies, I had chance to work on 'APP' built on full stack technologies.

"I believe technology should be developed to serve people and not to become hurdles in there way."
